PROFESSIONAL EXPERIENCE

- Senior Full Stack Developer | Freelance & Remote Consulting

2026 – Present (Current)

 - Architecting bespoke SaaS platforms, multi-tenant administrative dashboards, and custom corporate web portals for regional and international clients using modern Laravel and clean frontend stacks.
 - Integrating artificial intelligence workflows (AI Integration & Prompt Engineering) to automate business processes, customer interactions, and dynamic content generation.
 - Delivering high-converting, mobile-responsive UI/UX designs that accelerate client brand authority and optimize end-user engagement.
- Senior Web Developer & Laravel Lead | Trickces Software

2021 – 2026 (5 Years)

 - Directed end-to-end backend engineering for enterprise web platforms, complex SaaS applications, and high-traffic e-commerce solutions using Laravel, PHP, and MySQL.
 - Designed secure, scalable RESTful API endpoints and integrated multi-channel online payment gateways (Paymob, Fawry, Stripe, PayPal) with automated webhooks and transaction auditing.
 - Optimized relational database schemas, complex SQL queries, and server-side caching mechanisms to maintain ultra-fast page load times and sub-second response rates across heavy concurrent traffic.
 - Enforced coding standards, modular architecture, and security protocols to safeguard sensitive customer and organizational data.
- Web Developer | Domainato

2019 – 2021 (2 Years)

 - Engineered and maintained domain management portals, hosting configuration tools, and client self-service administrative dashboards utilizing PHP, Laravel, MySQL, Bootstrap, and JavaScript.
 - Developed responsive, interactive user interfaces and streamlined customer onboarding workflows until corporate closure in 2021.
